Senior Data Scientist with 8+ years of experience building data and AI products for pharma and aerospace.

Work Experience

MSD France — ***CoE Insight, Analytics & Data*** *Paris, France*

Senior Data Scientist II *Nov. 2025 — Present*

- Built a Health Care Organization (HCO) intelligence platform partnering with cross-functional stakeholders (Oncology, Sales, KAM, Finance), covering 400+ HCOs with short- and long-term demand forecasts; automated anomaly flagging and prioritization.
- Investigated suspected grey-market vaccine diversion in French pharmacies by building a tool that reconciles sell-in, sell-out and direct-sales data, leading to a formal report to the authorities.

Senior Data Scientist *Jan. 2023 — Oct. 2025*

- Delivered data science, automation, and analytics solutions for the Oncology (2023–2024) and Vaccines Business Units (since 2025), partnering with Customer Engagement, Marketing, Sales, and Compliance teams.
- Directed the Next Best Engagement (NBE) platform redesign, leading a team of 3 developers and establishing CI/CD standards that reduced time-to-market by 75% with zero downtime, serving 100k+ personalized recommendations to 180+ sales representatives.
- Coached peers company-wide on software engineering best practices in Dataiku; designed the CI/CD framework and testing suite and reported cybersecurity risks.

Pierre Fabre Group — ***CoE Data*** *Lavaur, France*

Data Scientist *Sep. 2021 — Nov. 2022*

- Created a Key Opinion Leader mapping platform for Medical Science Liaison teams, saving 500k€/year.
- Applied NLP to automate chemogenomics cross-referencing, saving Business Development >250 hours/year.
- Modeled email interaction networks using graph theory, helping HR monitor organizational effectiveness.

Airbus Commercial Aircraft — ***Design Office, Acoustics Department*** *Toulouse, France*

Data Scientist Apprentice *Sep. 2018 — Aug. 2021*

- Automated anomaly detection and cleaning of flight recordings, cutting processing time and costs by >90%.
- Analyzed production-quality data to monitor performance and perform root-cause analysis of identified drifts.
- Clustered flight trajectories to improve noise-map accuracy and support traffic-growth simulations.
- Optimized engine blade designs using genetic algorithms and neural networks.

Education

University of Technology of Compiègne (UTC) *Compiègne, France*

5-year Computer Science and Engineering Degree (equiv. MSc) — GPA: 4.49/5.00 *Sept. 2015 — Aug. 2021*

- Computer science & IT, databases, operations research, mathematics, statistics, economics, business strategy
- 6-month exchange program at Riga Technical University (Latvia): AI, business analytics, IT project management.
- Research projects: SNCF (train energy optimization) · University of Waterloo (home occupancy prediction from >600 GB of thermostat data).

Skills

Languages: French (native) · English (C1, TOEIC 985/990) · Spanish (B2) · Chinese (HSK3)

Programming: Python · SQL · Spark

Data, ML & AI: pandas · scikit-learn · XGBoost · LightGBM · tensorflow/keras · streamlit

Platforms: Dataiku · Databricks · Palantir · GCP · GitHub (Actions, Copilot) · Veeva CRM · SAP
